

CORPORATE RISK CONTROL PROFILE

Outline Profile

The emphasis of the consultancy is technical assistance to the underwriting industry and associated interests.

Risk management, underwriting surveys, loss prevention, loss estimation and reinstatement valuation are the “bread and butter” activities of the business.

Engineers, surveyors and practitioners effect assignments globally, although efforts are concentrated in Middle East and Asia Pacific.

Typical assignments include the following :

- Chemical processing plants,
- Offshore exploration and production related facilities,
- Electricity generating plants,
- Ports and marine facilities,
- Railway operations, underground, at-grade and elevated,
- Hotels and resorts,
- Hospitals and medical facilities,
- Commercial buildings,
- Shopping plazas,

Construction projects

- Underground tunneling,
- Elevated rail and road systems,
- Infrastructures
- Bridges
- Industrial buildings
- Ports and marine facilities,
- Commercial, residential, hospital and hotels.
- Transmission lines, and power plants.

Quarrying and mines

- Operations, machinery, and blasting, etc.

Condition monitoring

- Pre-construction projects potentially affecting 3rd party properties, buildings and utilities; “as is” condition assessment and records establishment.

Loss and accident investigation, loss assessment

- Data gathering and analysis towards claim preparation and/or resolution.

CORPORATE RISK CONTROL

Emergency response planning

Procedures review and assessment, preparation, attendance as observers during exercises.

Contingency planning and post disaster recovery :

Provision of procedures to mitigate loss accumulations resulting from anomalies that would give rise to interruption or delays to resumption of business following an incident.

Industrial security, safety management and fire engineering

Loss prevention involves comprehensive auditing and protection systems review. The security department provides a wide range of services from surveillance to selection of security related equipment.

Loss estimation, sums insured review and reinstatement valuation

In association with RCG partner, John Foord International Ltd., values are computed to assist underwriters, insurers and loss adjusters, as appropriate, with extensive involvement in assuring accurate sums to be insured and protection against claims for average being applied.

The foregoing is but a very brief outline.
